## ChaoBaby, Sheffield, Birmingham & Manchester

We'd already worked with Thai Leisure Group to fit out a number of branches of Chaophraya, their original Thai restaurant. We were excited to be invited to work with them again on the new ChaoBaby concept - a smaller, buffet style eatery.

Martin and Kim, the owners of Thai Leisure, wanted to bring royal Thai food to UK diners and were keen to achieve a luxurious, authentically Thai feel to their restaurants. The brief was to create sumptuous spaces with theatrical flair.

Name: ChaoBaby, Sheffield,  
Birmingham & Manchester  
Location: Sheffield, Birmingham &  
Manchester  
Scope: Bar + Restaurant Fit Out

#### **OPEN PLAN KITCHENS**

We created open plan kitchens with central cooking islands so diners could see the chefs at work, incorporating beautiful black granite sheets onto the back wall cook-line, and 15-metre open plan granite servery displays.

#### **VARIED MATERIALS**

The bespoke bars incorporate sleek white Corian, artfully illuminated glass and marble. The bar frontage has custom-made back-lit layered glass panels, designed to diffuse the light in the cosy bar area.

#### **RESTAURANT + BAR FURNITURE**

We provided bespoke furniture for ChaoBaby, including free-standing tables and chairs, long and short fixed seating for the tapas and sweet areas, and a variety of bar furniture.

#### **SERVERY COUNTER**

The servery counter has a beautiful, hard-wearing granite top, a layered glass frontage running the length of the counter, and a back lighting panel, illuminated from the top down.

## GLASS FEATURES

For ChaoBaby Meadowhall, we created and installed a large layered glass Buddah to act as a breathtaking focal point. Paired with the aquarium windows, these authentic touches complete the mood.

## LOW ENERGY THEATRE KITCHENS

The theatre kitchens were designed to be efficient, functional and eco-friendly, with induction wok stations, bespoke ventilation, and in-built low energy induction hobs for hot holding.

## BESPOKE COMMERCIAL BARS

We created bespoke bars from welded stainless steel sections coupled with a seamless bullnose lower counter top, with under-counter refrigeration, glass-washer, dive-in cooler and back bar cooler.

## BACK OF HOUSE

The back of house preparation area is filled with an EcoBar - a stainless steel forced air preparation fridge - with a rounded front edge, adjustable legs and adjustable interior shelves, plus precision double door refrigeration.
