## Holiday Inn Central Park, Manchester

We worked closely with project designers to undertake a complete turnkey fit out at Holiday Inn Manchester – Central Park, manufacturing bespoke metal screens and fittings, supplying and fitting a brand new bar and furniture, carrying out structural work and refurnishing the area as a whole.

Name: Holiday Inn Central Park,  
Manchester  
Location: Manchester  
Scope: Bar + Restaurant Fit Out

The open plan lobby is the latest design concept by Holiday Inn, allowing guests to circulate freely in a relaxing space. Our brief for the Central Park site was to incorporate this spacious feel while taking inspiration from Manchester's industrial history.

#### **TURNKEY FIT OUT**

This was a full turnkey fit out project, including furniture, bar and servery counter, flooring and lighting, new private dining and meeting rooms, bespoke wall and ceiling finishes, and reception desks.

#### **BESPOKE METALWORK**

We designed and manufactured a lot of bespoke metalwork for this project to tie in with the industrial Manchester theme, including heavy duty industrial style mill doors, and metal display cases with solid oak shelving.

#### **LOGISTICS**

We planned carefully in order to keep the hotel open during this six-week project. We worked on the entrance and reception area at night, clearing all clutter away before morning.

#### **CENTRAL BAR SYSTEM**

The central bar has a low back bar, giving customers a clear view through to the lobby. The mild steel back bar display has shutter style doors, complementing the industrial look and providing additional security at night.
