## Sky Garden, London

We were commissioned to furnish the restaurant at The Sky Garden. Far and away London's highest public garden, The Sky Garden sits atop the Walkie Talkie skyscraper - as it's affectionately known - and offers visitors a unique experience at the heart of the city.

Name: Sky Garden, London  
Location: London  
Scope: Restaurant Furniture

As you might expect, the location of The Sky Garden - 36 floors above the ground - presented us with our biggest challenge on this project. We had to plan our work carefully, using the lift only during allocated times to minimise disruption.

## MINIMALIST DESIGN

Sleek, minimalist design was at the heart of this project. We created a range of bespoke, hand-crafted furniture for the venue, featuring clean lines, cool marble, and smooth, leather upholstery.

## LOGISTICS

The Sky Garden project was an exercise in logistics, with over 200 chairs and 60 tables being taken apart by hand in order to fit in the lifts, before being reassembled in situ.

## BESPOKE TABLE TOPS + BASES

We manufactured a range of beautiful bespoke tables, designed according to the client's exact specifications. The table bases were also Italian styled, set at a specific dining height.

## CUSTOM ITALIAN SEATING

We designed the dining and armchairs, and had them manufactured in Italy using the highest quality Italian leathers. These were accompanied by upholstered Italian low stools on chic chrome bases.
